

Easy-Cut Lead Cutter

EZ0503

This is the ultimate tool for cutting lead at perfect angles!

IMPORTANT INFORMATION AND SAFETY TIPS

1. Completely read and follow all instructions before operating.
2. Do not eat, drink or smoke while you are handling lead.
3. Do not put your hands in your mouth while you are handling lead.
5. Keep lead away from children and pets.
6. Do not work with lead in the kitchen or any other place where food is prepared.
7. If you are pregnant, don't use any lead materials.

EASY-CUT LEAD CUTTER INSTRUCTIONS

1. Set desired angle 30°, 45°, 60°, and 90° on the swiveling fence by loosening the locking bolt on the top of the fence. Line up fence with desired angle marks located on the base of the Lead Cutter.
2. When cutting lead into shorter pieces from a long piece, trim off the V from a previously cut before making your cut. To set a desired came length, loosen the locking bolt on the side of the stop situated on the top of the angle fence. Move the stop into position and tighten locking bolt.
3. Start cuts with the top side of the lead facing up, not the channel.
4. Feed the lead under the blade against the fence. Hold the lead steady with one hand and using the opposite hand, lower the cutting handle. If the blade is difficult to get through the lead, it is probably dull. Don't force the cut this may twist or crush the lead.

CHANGING BLADES

1. Use a heavy-duty single-end razor blade. **WARNING:** Blades are sharp, handle with extreme care. Do NOT remove protective cardboard covering from blade before installing.
2. Replace by loosening screws on either side of the silver blade plate, located underneath the wooden cutting handle. Remove plate and worn blade, disposing of blade immediately. Replace blade and cover and secure with screws.

REPLACEMENT PART

Heavy-duty single-edge razor blades for replacement blades (#503B 2pk).

ONE YEAR WARRANTY

The Easy-cut Lead Cutter™ is warranted to the original purchaser for one year from the original date of purchase. This warranty is against defective

material or workmanship but does not include damage due to neglect, improper use or any other cause not attributed to defects in material or workmanship (excludes blades).
